WORK EXPERIENCE

Lab Engineer – Energy & Mechanical Systems

Standards Institution of Israel (SII), Tel Aviv, Israel | Jul 2018 – Present

- Analyze regulatory compliance data against Israeli electricity-market and international standards for energy storage and renewable technologies.
- Evaluate system performance trends to drive improvements in efficiency, reliability, and safety.
- Test and certify photovoltaic systems, energy storage batteries, PCS systems, and hybrid inverters against IEC, ISO, and UL standards.

Additional experience available on LinkedIn.

FEATURED PROJECT

Israeli Supermarket Price Comparison – Live Data Platform

Personal Project, Be'er Ya'akov, Israel | 2026 – Present

- Built a live, automated grocery price-comparison platform for Israel's 4 major chains — daily **Python** ETL via **GitHub Actions** CI/CD, publishing live pricing and trend data (**60,000+** products).

PROJECTS

yad2 Real Estate Listings

Personal Project, Be'er Ya'akov, Israel | June 2026

- Extracted **Kaggle** data for real estate sales and created a **Dashboard** in **Microsoft Power BI** with graphs and charts based on price, location, property type, and square meters.

Amazon Product Analysis

University Project, Ramat Gan, Israel | August 2025

- Extracted and cleaned sales data from Amazon product review pages into an **Excel** database with **Pivot Tables** and **graphs** for insight into product reviews.

Trends and Sales with Marketing

University Project, Ramat Gan, Israel | April 2025

- Used **Google Trends** and **Dataset** in conjunction with **SteamDB** to find the correlation between marketing/online trends and PC game sales, based on media like Netflix and others.
